

Correspondence of The N. Y. Tribune.
New-York, July 27, 1861.

NEWPORT, July 25, 1900.

And now, the Rhode Island regiments return, and women receive their dead again, those at least of whom they thought as such. My heart sympathizes with their joy, the relief from the utmost tension of anxiety that human heart can feel. But most I honor in remembrance one of the most sensitive and delicate natured of those who, in the first sorrow of last Monday, said: "I am so penetrated with grief for my country's disgrace, that even my boy's safety gives me no comfort." Yes, better to think of the deep loss as

THE ARMY WORM.

F ● n the Old Colony Memorial

But they are gradually disappearing, and all who are interested in the matter may easily observe how they accomplish their exit. On a farm where the worms have been very numerous and destructive, we have seen the transformation from the caterpillar to the chrysalis state. This happened on Thursday last, and two weeks after their first appearance. We had been aware that the number had been diminished for two days. The fall-grown ones had gone, and only very small or half-grown ones remained. For a time no traces of them could be found. One of the persons mentioned in investigating a depression in the surface of the ground found great numbers of the worms had been the ground found several chrysalids completely transformed.

CITY ITEMS

Mr. B. is a purely scientific man, has been studying chemistry at the German universities, and was returning to his home to prosecute his quiet scholarly life. I have met him before in Europe, and can vouch for personal knowledge that his being engaged in any political intrigue is the sheerest impossibility. It is a pity that his letters of introduction to Southern men, by means of which he hoped to reach home, should be taken from him as "important papers," and be him self exposed as a spy to unjust suspicion.

How Freedom formed our banner fair

riage was hailed to stop; the wife ran to its door, and opening it, found the handsome and richly-dressed "error" inside. The account was immediately squared, and the balance struck.

SECESSION OF PRINTERS.—On the 13th inst. the Montgomery (Ala.) Typographical Union adopted a series of resolutions severing their connection with the National Typographical Union, expressing their conviction that the fraternal feeling heretofore existing between the Northern and Southern Unions cannot again be restored, and recommending a Convention of Southern Typographical Unions at New-Orleans on the fourth Monday in December, for the purpose of forming a Southern National Typographical Union.
